SUMMARY

Cybersecurity practitioner with hands-on experience administering Cisco ASA/FTD firewalls across 50+ global production environments, designing/enforcing NIST-aligned controls, and automating incident response. Skilled in traffic-flow analysis, network segmentation, and cross-functional coordination with global stakeholders to translate ambiguous connectivity requirements into secure configurations. Proficient with SIEM/EDR, firewall administration, and threat hunting. Currently holds the Security+, Google Cybersecurity Professional, and AZ-900 certifications.

EXPERIENCE

Johnson & Johnson | *Network Security Analyst (Firewall Engineer)* *Raritan, NJ (Remote)* **Dec 2025 - Present**

- Configure and manage Cisco ASA and FTD firewalls across 50+ global production environments (spanning MedTech and Integrated Manufacturing sites) in accordance with ISA-95 and Purdue Model standards
- Manage network object groups (subnets/VLANs) across 20+ OT-adjacent firewalls to enable or maintain scoped device-to-server communication for manufacturing and edge-computing environments
- Perform packet/traffic-flow analysis and firewall logging to identify unknown source/destination IPs and ports when application owners can't provide complete connectivity requirements
- Resolved 500+ domain-to-firewall routing errors via NSlookup and VBA-driven auditing; added corrected subnets to network object groups for application access
- Serve as point of contact for firewall deployment and configuration requests, coordinating with InfoSec Risk Management (ISRM), Technical Services (TS), and site stakeholders across global business units to gather and validate connectivity requirements

Multi-State Lottery Association | *Information Security Intern* *Urbandale, IA* **May 2024 - Aug 2024**

- Audited security policies against NIST CSF/800-53 and maintained BC/DR plans, updating 10+ procedures to strengthen the control environment
- Executed InsightVM vulnerability scans across 100+ endpoints and validated FortiGate configurations, remediating misconfigurations and prioritizing ~30 findings for remediation
- Developed executive-level security awareness training on emerging cyber threats, improving incident response readiness for 15 stakeholders

Hexagon PPM | *Research & Development Security Intern* *Houston, TX* **Jul 2022 - Sep 2022**

- Gained early exposure to OT network security, monitoring traffic with a proprietary SIEM-like tool (Cyber Integrity) to detect anomalous activity

EDUCATION

Iowa State University | *Cybersecurity Engineering B.S.* *Ames, IA* **Aug 2020 - Dec 2024**

- Coursework and projects spanned offensive/defensive security (Red/Blue Team simulations with pfsense, OpenVAS, BurpSuite), digital forensics (Ghidra, IDA Pro malware analysis), and co-led a 5-person team building an OWASP Top 10 training game for Senior Design Project

PERSONAL PROJECTS

Cyber Portfolio & Website Hosting on AWS | *Personal Projects* **Jun 2025 - Present**

- Built and deployed a static cybersecurity portfolio using an S3 bucket, CloudFront, Route 53, and ACM with HTTPS
- Linked GitHub repositories featuring technical write-ups, CTF reports, and project documentation
- Applied secure hosting practices and monitored site performance using AWS tools

SKILLS

- **Core Competencies:** IT/Network Security, Vulnerability Assessment, Threat Detection, Incident Response, SIEM/EDR, Traffic-flow/Packet Analysis, Ethical Hacking, OT Security, Azure Security Controls
- **Tools & Technologies:** Wireshark, Metasploit, tcpdump, Nmap, MySQL, Cisco ASA & FTD, AlienVault, Splunk, Chronicle, Tenable, EntraID/AD, Rapid7 InsightVM, Fortinet/FortiGate, Pfsense, IDA Pro, Ghidra, VMware, VirtualBox, NIST (800-53 & CSF), ISO 27001, CIS 18, SOC2, Office365
- **Programming/Scripting:** Python, C++, SQL, PowerShell, Java, VBA
- **Soft Skills:** Detail Oriented, Problem Solving, Teamwork, Project Management

CERTIFICATES

- **CompTIA Security+ (Apr 2025)**
- **AZ-900 - Microsoft Azure Fund. (May 2025)**
- **Google Cybersecurity Prof. (Mar 2024)**
- **Antisyphon - CIS 18 Auditing (Apr 2025)**
- **Antisyphon - Human Factor in AI Security (May 2025)**
- **Antisyphon - Rapid Endpoint Investigations (May 2025)**
